#### NATIONAL CENTER FOR EDUCATION STATISTICS

Public elementary and secondary enrollment is projected to reach 47.4 million in 2002, and to increase through 2005, before decreasing slowly. The West will experience most of this increase.

The baby boom echo—the 25 percent increase in the nation's number of annual births that began in the mid-1970s and peaked in 1990 and rising immigration have boosted school enrollment. Growing enrollments in public elementary and secondary schools are expected to continue through 2005, before decreasing slowly.

After declining during the 1970s and early 1980s, enrollment in public schools for grades K-12 increased in the latter part of the 1980s and the 1990s, reaching an estimated 47.2 million in 2001. This enrollment is projected to be 47.4 million in 2002. Through the first half of this decade, public enrollment for grades K-12 is projected to continue increasing to an all-time high of 47.5 million in 2005, and then to begin declining slightly. Between 2001 and 2011, public enrollment in grades K-8 is projected to decrease slowly through 2008 and then to increase slowly, whereas

public enrollment in grades 9-12 is projected to increase through 2006 and then to decrease slowly (see supplemental table 2-1).

The regional distribution of students in public schools has changed since the 1970s, with the West increasing its total share of enrollment. Between 2001 and 2011, public enrollment in grades K-12 is expected to decrease in the Northeast and Midwest, remain relatively stable in the South, and increase in the West (see supplemental table 2-2).

In 1999-2000, private school enrollment for grades K-12 was 5.1 million. It was higher in 1999-2000 than in 1989-90. Between these years, enrollments in private schools increased in both the South and West. Despite increases in enrollment in the West, private enrollment for grades K-12 was lowest in the West and highest in the South in 1999–2000 (see supplemental table 2-3).

NOTE: Includes most kindergarten and some nursery school enrollment.
